“ Wayne has been instrumental in my growth and development as a leader. He’s been able to help me see my leadership blind spots and has shown me how to effectively address and avoid roadblocks that are not aligned with our company’s core convictions and vision. He’s always focused on helping me move and improve and be driven by purpose instead of reactions. He’s an amazing coach and motivational speaker.

“ Wayne was invited to speak at one of our Team Meetings. We were so excited to have him and he exceeded our expectations. Wayne's information was just what we needed and his presentation was high energy, interactive and super informative. Our agents walked away from that experience with a set of instructions on how to improve their business and their lives.

“ We recently had Wayne speak at our annual conference event and were thoroughly impressed with his Keynote address. He was warm and thought-provoking and left our attendees excited and ready to make the most of our event. Even days later members of the audience were still bringing up topics from his speech. I would highly recommend working with Wayne!

“ Wayne was great! Great content. Incredible range of emotion covered within his timeframe and many life lessons learned or reflected upon. I loved his energy and that he made us think deeply about the success and what that looks like. He was very personable, engaging, good energy. and great insights. He had such relatable content and “told us what we didn’t necessarily want to hear” which I think is important to foster growth.
